Safeguard your SMB business with Microsoft Defender for Business

Microsoft Defender for Business is a cost-effective and easy-to-use solution designed to strengthen security for small and medium-sized businesses (SMBs).

Here's why Microsoft Defender for Business should be your go-to choice for securing your business:

Enterprise-grade protection: Go beyond traditional antivirus. Defender for Business offers robust protection against malware, ransomware, phishing attacks, and more for **Windows, macOS, iOS, and Android** devices.

Unified security solution: Save costs by consolidating multiple products into a single platform optimised for SMBs. Simplify management with easy-to-use controls and out-of-the-box policies.

Vulnerability management: Identify weaknesses and strengthen security. Prioritise and remediate software vulnerabilities and misconfigurations that pose the highest risk to your business.

Next-generation antivirus: Block emerging threats with AI-powered antivirus protection. Stay ahead of cyberattacks and protect your devices.

Automated investigation and remediation: Resolve most cyberthreats automatically. Defender for Business disrupts in-progress ransomware attacks in real-time.

Monthly security summary reports: Track protection status and stay informed about your security posture.

Microsoft

Why choose Microsoft Defender for Business?

Comprehensive solution: Defender for Business covers endpoint protection, mobile device security, server protection, and patch recommendations – all integrated seamlessly with Microsoft 365.

Cost-effective: By choosing Defender for Business, ou get robust security without breaking the bank. No need for additional add-ons or complex licensing.

Easy onboarding: Wizard-based onboarding ensures a smooth transition. Simplified management means less time spent configuring and more time focusing on growth.
